

ESG Manager Course

Siri 1 (ESG01): Sustainability and Environment

This course aims at professionals responsible for planning, strategising and managing sustainability for their organisation. This course will cover background of sustainable development goals (SDGs), climate change and greenhouse gas (GHG) developing sustainability indicators, and options for sustainability solutions. This training is designed to provide participants with essential understanding of sustainability approaches and methodologies.

This is also one of the essential course for Sustainability / ESG Manager. Upon completion of this course, one can also register for our other four courses to obtain the ESG Manager certificate.

Objective

To equip participants with the fundamental and practical understanding of the sustainability and its relation to environment.

Trainer

Ts. Teh Soo Tyng

Guest Trainer

Dr. Chen Sau Soon

Ts. Teh Soo Tyng

Ts. Teh Soo Tyng embarked on sustainability management career for more than 13 years. Ts. Teh Soo Tyng has experience in establishing carbon footprint for printed material since 2010. She has additional expertise in eco-conception, life cycle assessment (LCA), carbon footprint (CFP) analysis and sustainability reporting (SR). In 2016, she is recognised as National Industry Expert and Panel NOSS (National Occupational Standard Scheme) of Environment by Ministry of Human Resources Malaysia. In 2018, she is conferred as Certified Sustainability Practitioner by Institute of Certified Sustainability Practitioners. She became a certified trainer cum assessor and WELL Accredited Professional (WELL AP) in 2020 and International Sustainability and Carbon Certification (ISCC) auditor in 2023.

Dr. Chen Sau Soon retired from SIRIM after 37 years of service as a researcher attached to a number of technology areas covering metalworking, chemical technology and environment and energy.

In the field of environmental and energy technology, she has implemented and managed a number of industrial, government and collaborative international R&D projects using biotechnology and physicochemical technology for hazardous waste treatment, wastewater treatment and waste management technologies, environmental and health risk assessment, cleaner technology, and renewable energy generation.

Dr. Chen Sau Soon

Her latest approved project will look into developing ecodesign of products and processes to address concerns of climate change, resource scarcity and continual degradation of the environment.

Her skills related to Greenhouse gases (GHG) Management includes GHG accounting (Carbon footprint), climate change mitigation and adaptation, life cycle assessment (LCA), Clean Development Mechanism (CDM Technical Reviewer).
