

ESG Manager Course

Siri 3 (ESG03): GHG Management

This course aims at professionals responsible for measuring, reporting and managing carbon dioxide and other Greenhouse Gas (GHG) emissions for their organisation. This course will provide you the latest information regarding GHG emissions accounting and management and focuses on areas such as: background to climate change, developing a carbon accounting system, managing GHG emissions and options for reducing GHG emissions.

This is also one of the essential course for Sustainability / ESG Manager. Upon completion of this course, one can also register for our other four courses and assessment to obtain the ESG Manager certificate.

Objective

To provide participants with essential understanding of carbon accounting approaches and methodologies based on ISO 14064 and the GHG Protocol: Corporate Accounting and Reporting Standards.

Trainer

Ts. Teh Soo Tyng

Guest Trainer

Mr. Tang Kok Mun

Ts. Teh Soo Tyng

Ts. Teh Soo Tyng embarked on sustainability management career for more than 13 years. Ts. Teh Soo Tyng has experience in establishing carbon footprint for printed material since 2010. She has additional expertise in eco-conception, life cycle assessment (LCA), carbon footprint (CFP) analysis and sustainability reporting (SR). In 2016, she is recognised as National Industry Expert and Panel NOSS (National Occupational Standard Scheme) of Environment by Ministry of Human Resources Malaysia. In 2018, she is coffered as Certified Sustainability Practitioner by Institute of Certified Sustainability Practitioners. She became a certified trainer cum assessor and WELL Accredited Professional (WELL AP) in 2020 and International Sustainability and Carbon Certification (ISCC) auditor in 2023.

Mr. Tang Kok Mun

Mr. Tang Kok Mun focuses on areas of corporate environmental sustainability, specifically in life cycle assessment, greenhouse gases assessment, ISO14046, net zero road mapping, as well as development and commercialisation of sustainable technologies, technical and commercial consultancy for the circular economy, strategic development of sustainable actions.

Mr. Tang's main expertise is in the area of sustainable technology commercialisation, biomass utilisation. He collaborates extensively with universities and research institutions to tap into their research expertise and technical know-how to develop appropriate technologies for commercial markets.

He has previously served as a technical consultant in a number of EU-Malaysia programmes that focused on new and sustainable industries such as the biomass industry, solid waste management and biotechnology. He has also spoken at several regional events in the topics of technology commercialisation, sustainable technologies, as well as bioenergy and high-value utilisation of biomass resources. He is also the lead author of a paper on the status of biochar utilisation in Malaysia and country paper on bioenergy status in Malaysia.
