

Siri 17 (ESG17): Mastering IFRS S 2 – Climate Risk Management

This course offers a comprehensive, practice-driven journey through the science, risks, regulatory expectations, and strategic imperatives of climate change. Tailored for professionals, it demystifies climate-related disclosures and equips organizations to build credible, actionable transition pathways.

Participants will engage deeply with global frameworks such as IFRS and GHG Protocol, learning how to measure and manage climate risk, report transparently, and embed climate considerations into enterprise risk management and strategic planning.

Objective

- To build the understanding of climate risk management and its integration with existing risk management
- To apply the credible tools to meet the requirement of sustainability reporting

Learning Outcomes

- Understand material climate and related risks under global standards
- Conduct climate risk assessments
- Build credible, standards-aligned transition plans

Trainer

Mr. Khoo Hock

Mr. Khoo Hock

Mr. Khoo Hock, a GARP member trained in Sustainability and Climate Risk (SCR), is a certified COSIRI Assessor and carbon verifier. His focus is on the measurement, reporting, and verification (MRV) of greenhouse gas (GHG) emissions and smart factory digitalization. Leveraging the COSIRI (Consumer Sustainability Industry Readiness Index) framework, he assists manufacturers in assessing and improving their sustainability and climate-related practices. Khoo Hock also supports organizations in GHG accounting and developing effective carbon reduction plans. In addition, he is familiar with IFRS S1 and S2 requirements, enabling alignment of sustainability disclosures with global reporting standards.
